1 **Genetics of microtubule systems.** E. C. Raff

Regular Articles

11 **Phosphorylation of microtubule-associated proteins by a Ca^{2+}/calmodulin-dependent protein kinase.** H. Schulman

20 **Identification, developmental regulation, and response to heat shock of two antigenically related forms of a major nuclear envelope protein in *Drosophila* embryos: application of an improved method for affinity purification of antibodies using polypeptides immobilized on nitrocellulose blots.** D. E. Smith and P. A. Fisher

29 **Dualistic nature of adhesive protein function: fibronectin and its biologically active peptide fragments can autoinhibit fibronectin function.** K. M. Yamada and D. W. Kennedy

37 **Colchicine binding activity distinguishes sea urchin egg and outer doublet tubulins.** L. Wilson, H. P. Miller, T. A. Pfeffer, K. F. Sullivan, and H. W. Detrich III

42 **The higher-order structure of chromatin: evidence for a helical ribbon arrangement.** C. L. F. Woodcock, L.-L. Y. Frado, and J. B. Rattner

53 **A novel approach for scanning electron microscopy of colloidal gold–labeled cell surfaces.** E. de Harven, R. Leung, and H. Christensen

58 **A membrane cytoskeleton from *Dictyostelium discoideum*. II. Integral proteins mediate the binding of plasma membranes to F-actin affinity beads.** E. J. Luna, C. M. Goodloe-Holland, and H. M. Ingalls

71 **A membrane cytoskeleton from *Dictyostelium discoideum*. III. Plasma membrane fragments bind predominantly to the sides of actin filaments.** C. M. Goodloe-Holland and E. J. Luna

79 **Specific inhibition of the differentiation of *Trypanosoma cruzi*.** G. T. Williams

83 **Peripheral proteins of postsynaptic membranes from *Torpedo* electric organ identified with monoclonal antibodies.** S. C. Froehner

92 **Thyrotropin-releasing hormone (TRH) increases cytosolic free Ca^{2+} in clonal pituitary cells (GH_3 cells): direct evidence for the mobilization of cellular calcium.** W. Schlegel and C. B. Wollheim

97 **Somatostatin discriminates between the intracellular pathways of secretory and membrane proteins.** R. Green and D. Shields

105 **The role of intermolecular disulfide bonding in deposition of GP140 in the extracellular matrix.** W. G. Carter

115 **Induction of chondrogenesis in limb mesenchymal cultures by disruption of the actin cytoskeleton.** N. C. Zanetti and M. Solursh

124 **Specific localization of the α-latrotoxin receptor in the nerve terminal plasma membrane.** F. Valtorta, L. Madeddu, J. Meldolesi, and B. Ceccarelli

133 **Transient *N*-acetylglucosamine in the biosynthesis of phytohemagglutinin: attachment in the Golgi apparatus and removal in protein bodies.** A. Vitale and M. J. Chrispeels

141 **Taxol-induced rose microtubule polymerization in vitro and its inhibition by colchicine.** L. C. Morejohn and D. E. Fosket

148 **Role of the cytoskeleton in the formation, stabilization, and removal of acetylcholine receptor clusters in cultured muscle cells.** J. A. Connolly

155 **Cell cycle regulation of tubulin RNA level, tubulin protein synthesis, and assembly of microtubules in *Physarum*.** T. Schedl, T. G. Burland, K. Gull, and W. F. Dove

166 **Ferritin immunoelectron microscopic localization of 5′-nucleotidase on rat liver cell surface.** S. Matsuura, S. Eto, K. Kato, and Y. Tashiro

174 **Substituted benzyl acetates: a new class of compounds that reduce gap junctional conductance by cytoplasmic acidification.** D. C. Spray, J. Nerbonne, A. Campos de Carvalho, A. L. Harris, and M. V. L. Bennett

180 **Dihydrofolate reductase gene expression in cultured mouse cells is regulated by transcript stabilization in the nucleus.** E. J. Leys, G. F. Crouse, and R. E. Kellems

188 **A reevaluation of the structure of purified tubulin in solution: evidence for the prevalence of oligomers over dimers at room temperature.** N. G. Kravit, C. S. Regula, and R. D. Berlin

199 **Durable synthesis of high molecular weight heat shock proteins in G_0 cells of the yeast and other eucaryotes.** H. Iida and I. Yahara

208 **Synthesis of a low molecular weight collagen by chondrocytes from the presumptive calcification region of the embryonic chick sterna: the influence of culture with collagen gels.** G. J. Gibson, B. W. Beaumont, and M. H. Flint

217 ***Acanthamoeba castellanii* capping protein: properties, mechanism of action, immunologic cross-reactivity, and localization.** J. A. Cooper, J. D. Blum, and T. D. Pollard

226 **β_2-Microglobulin induces intracellular transport of human class I transplantation antigen heavy chains in *Xenopus laevis* oocytes.** L. Severinsson and P. A. Peterson

233 **A cytological approach to the ordering of events in gene activation using the *Sgs-4* locus of *Drosophila melanogaster*.** E. K. Steiner, J. C. Eissenberg, and S. C. R. Elgin

239 **Actin in the photoreceptor connecting cilium: immunocytochemical localization to the site of outer segment disk formation.** M. H. Chaitin, B. G. Schneider, M. O. Hall, and D. S. Papermaster

248 **Transport of protein between cytoplasmic membranes of fused cells: correspondence to processes reconstituted in a cell-free system.** J. E. Rothman, L. J. Urbani, and R. Brands

260 **Intercompartmental transport in the Golgi complex is a dissociative process: facile transfer of membrane protein between two Golgi populations.** J. E. Rothman, R. L. Miller, and L. J. Urbani

272 **Differences of supranucleosomal organization in different kinds of chromatin: cell type-specific globular subunits containing different numbers of nucleosomes.** H. Zentgraf and W. W. Franke

287 **Monoclonal antibodies prepared against *Dictyostelium* actin: characterization and interactions with actin.** P. A. Simpson, J. A. Spudich, and P. Parham

296 **Targeting of β-glucuronidase to lysosomes in mannose 6-phosphate receptor-deficient MOPC 315 cells.** C. A. Gabel and S. Kornfeld

306 **Differentiation of murine erythroleukemia cells results in the rapid repression of vimentin gene expression.** J. Ngai, Y. G. Capetanaki, and E. Lazarides

VOLUME 99 NUMBER 1 PART 2 JULY 1984

Proceedings of a Conference Sponsored by Fogarty International Center, National Institutes of Health

VOLUME 99 NUMBER 2 AUGUST 1984

2041 **Growth of neurites without filopodial or lamellipodial activity in the presence of cytochalasin B.** L. Marsh and P. C. Letourneau

2048 **Platelet-collagen adhesion: evidence for participation of antigenically distinct entities.** P. J. Shadle and S. H. Barondes

2056 **Platelet-collagen adhesion: inhibition by a monoclonal antibody that binds glycoprotein IIb.** P. J. Shadle, M. H. Ginsberg, E. F. Plow, and S. H. Barondes

2061 **Improved fixation for immunofluorescence microscopy using light-activated 1,3,5-triazido-2,4,6-trinitrobenzene (TTB).** E. McBeath and K. Fujiwara

2074 **Rapid changes in tubulin RNA synthesis and stability induced by deflagellation in *Chlamydomonas*.** E. J. Baker, J. A. Schloss, and J. L. Rosenbaum

2082 **Biosynthesis of the D2-cell adhesion molecule: posttranslational modifications, intracellular transport, and developmental changes.** J. M. Lyles, D. Linnemann, and E. Bock

2092 **An extracellular retinol-binding glycoprotein in the eyes of mutant rats with retinal dystrophy: development, localization, and biosynthesis.** F. Gonzalez-Fernandez, R. A. Landers, P. A. Glazebrook, S.-L. Fong, G. I. Liou, D. M. K. Lam, and C. D. B. Bridges

2099 **Cellular origin of fibronectin in interspecies hybrid kidneys.** H. Sariola, P. Kuusela, and P. Ekblom

2108 **Reformation of the marginal band of avian erythrocytes in vitro using calf-brain tubulin: peripheral determinants of microtubule form.** J. A. Swan and F. Solomon

2114 **Pericellular coat of chicken embryo chondrocytes: structural role of hyaluronate.** R. L. Goldberg and B. P. Toole

2123 **Biosynthesis of von Willebrand protein by human endothelial cells: processing steps and their intracellular localization.** D. D. Wagner and V. J. Marder
